NOVEMBER 2024

PROJECT HIGHLIGHT

Cherry Point TISD Renovation

The renovation of the Telecommunications & Information Systems Directorate Building involves reconfiguring interior spaces, updating restrooms, finishes, plumbing, HVAC systems, lighting, and expanding outlets and telecommunications infrastructure. Sensitive areas, including the Main Distribution, Fiber Optics, and Telephone Switch rooms, will stay fully operational and protected throughout construction to ensure continuity. Temporary trailers equipped with essential utilities will serve as workspaces for personnel displaced during the renovation. As a critical telecommunications hub for the Marine Corps on the Eastern Seaboard, the TISD Building plays a vital role in national defense, making this project essential to ongoing operations.

EMPLOYEE OF THE MONTH

Lonny Dickerson

Since joining CWC in February 2024, Lonny Dickerson has become an invaluable part of the project management team for the Cherry Point TISD Renovation project. His extensive construction experience and new role as QCM on a federal project have allowed him to put his valuable skills to use. We are thrilled to have Lonny's knowledge, experience, and positive attitude on the CWC Team.

4 DAY WEEKEND REMINDER

Civil Works is closed on November 28th & 29th

SEASONAL P.P.E. ASSESSMENT

As we complete current projects and move on to new job sites make sure all employees are equipped with the appropriate personal protective equipment for their tasks. Conduct a PPE assessment to identify any additional gear needed and provide it promptly. Review and prepare cold-weather gear to keep everyone safe and comfortable on the job site.
