

PROJECT HIGHLIGHT

CAMP LEJEUNE - INFRASTRUCTURE REPAIRS

Our federal division is making great progress on an infrastructure improvement project for Camp Lejeune. The work includes removing and replacing storm drain piping, structures, sidewalks, curbs, and gutters to enhance drainage and refresh the streetscape. Crews are also widening roads for uniform pavement width, preparing a new subbase for asphalt, and placing rip rap at storm drainage inlets and outlets to improve water flow. Additionally, we are backfilling areas where our subcontractor removed steam water piping, ensuring stability for the next phase. This project is advancing steadily, delivering quality and long-term sustainability for this critical military installation.

CarolinasAGC

2024 PINNACLE AWARD

We are honored to be recognized for our contributions to the 2024 Pinnacle Award-Winning Project: Hurricane Florence MILCON Package 4 Bridges on Camp Lejeune, NC. The CAGC Pinnacle Award is the gold standard of excellence in the Carolinas construction industry, celebrating the outstanding achievements of general contractors and their project partners.

EMPLOYEE SPOTLIGHT

THE 3 PILLARS OF SUCCESS

This month we are spotlighting Nya Payne. She exemplifies our three pillars of success—A True Team Player, Dedicated to Safety, Dependable & Reliable. She collaborates effortlessly with the team, and ensures all deadlines are met.

Nya consistently delivers quality work with a positive attitude, a growth mindset, and the grit to tackle any challenge. We appreciate her hard work and dedication. Thank you, for being a vital part of our team!

DRIVING IN WINTER CONDITIONS

Shorter days, morning glare, and lingering winter conditions like ice and sleet require extra caution. Increase stopping distances, keep a safe buffer between vehicles, and ensure loads are properly secured, as ice can loosen straps and cause shifting. Watch for snow or ice on other vehicles, as it can blow off and obstruct your view. Stay alert and drive safely!
