WOMEN IN CONSTRUCTION WEEK

At Civil Works Contracting, we proudly recognize the talented women whose expertise and leadership drive our success and advance the construction industry. Their commitment to excellence and innovation helps shape the industry's future, inspiring others to pursue careers in construction. This Women in Construction Week, we celebrate their contributions and honor all the women who build, lead, and strengthen the workforce every day.

PROJECT SPOTLIGHT SIEMENS MOBILITY

Civil Works Contracting is proud to partner with Siemens Mobility to expand its manufacturing footprint with a \$220 million rail facility in Lexington, NC. CWC is installing all rail within the factory and constructing the surrounding rail lines and yard, ensuring seamless integration with Siemens' operations. Our expertise in rail infrastructure is helping build a facility that will drive innovation in American rail transportation for years to come. This project highlights our commitment to building high-quality rail infrastructure for U.S. manufacturing.

TIPS FOR RIGGING SAFETY

Rigging safety is essential when lifting and moving heavy loads. Proper training, equipment inspections, and clear communication help prevent incidents caused by unstable loads, misinterpreted signals, or poor maintenance. Prioritizing safety ensures a secure work environment for all.

This month, we are spotlighting Higinio Mendez. He is always ready to lend a hand and tackle challenges head-on, prioritizing safety and ensuring deadlines are met. We appreciate his dedication & the positive impact he brings to our company every day.
